

HR APPLICANT PROCESSING SYSTEM

User Manual

Group 7 Capstone Project

1. Introduction

This User Manual provides instructions for using the HR Applicant Processing System. The system is designed to automate and simplify the recruitment process by allowing applicants to apply for jobs online while enabling HR personnel to efficiently manage applications, screening, interviews, and hiring decisions.

1.1 System Overview

The HR Applicant Processing System allows:

Applicants to:

- Register an account
- Log in securely
- Create and update profiles
- Upload required documents
- Browse job vacancies
- Submit applications
- Monitor application status

HR Personnel to:

- Manage job vacancies
- Review applications
- Conduct applicant screening
- Schedule interviews
- Evaluate interview results
- Make hiring decisions
- Generate recruitment reports

1.2 User Roles

Role	Description
Applicant	Registers and applies for available job vacancies.
HR Staff	Reviews applications, validates documents, conducts screening, and schedules interviews.
HR Manager/Admin	Manage job vacancies, approve final hiring decisions, manage users, and generate reports.
